Typefaces with TEX: a selection of those distributed with TEX Live 2008

(Draft 2008-04-13 for comment)

TEX systems can be used with any typeface in Postscript Type 1, METAFONT, TrueType, or OpenType format.[1] TEX's default is Computer Modern Roman, modelled after Monotype Series 8A.

10 Point No. 8A, 10 Set

MONOTYPE FACES

The best kind of originality is that which comes after a sound apprenticeship; that which shall prove to be the blending of a firm conception of all useful precedent and the progressive tendencies of an able mind. For, let a man be as able and original as he may, he cannot afford to discard knowledge of what has gone before or what is now going on in his own trade and profession. If the printers of today do not wish to be esteemed arrogant when they term this calling of theirs an art, they must be willing, and show that they are willing, to subject it to such laws as have made its sister arts so free. All those who are concerned in what are accepted as the fine arts, the learned sciences, and the professions surround *themselves with the history, literature, and concrete examples of the work with which they are particularly*
